

Website .csipasswd File Editor

The **Website .csipasswd File Editor** dialog box is used to edit the .csipasswd file. This file is used by the web server to manage user access to the website.

Realm – The name given to this realm. (A realm is a collection of user names and their access levels.) The name will be used in the prompt the browser displays when asking the user for a user name and password.

User Names – Shows the users that are currently defined in this realm. Press **Add** to add a new user. Select a user name in the list and press **Remove** to remove that user.

Access Level – Sets the access level for the selected user.

None – No access is allowed. The account is disabled.

Read Only – Allowed to view data. No values can be changed.

Read/Write – Allowed to view data, make changes to writeable values in a datalogger's Public or Status table or a virtual data source, and set a datalogger's clock.

All – Allowed to view data, make changes to writeable values in a datalogger's Public or Status table or a virtual data source, set a datalogger's clock, use the API FileControl command, and publish websites.

Password – The password for the selected user.

After defining the desired user names and access levels, press **OK** to save the changes. (Note that the new .csipasswd file will not be sent until you press **Publish Website**.) You can also press **Cancel** to discard the changes. Press **Read file** to read a .csipasswd file into the **Website .csipasswd File Editor**. Press **Save File** to save the contents of the **Website .csipasswd File Editor** to a .csipasswd file.
