Website .csipasswd File Editor

The **Website .csipasswd File Editor** dialog box is used to edit the .csipasswd file. This file is used by the web server to manage user access to the website.

Realm – The name given to this realm. (A realm is a collection of user names and their access levels.) The name will be used in the prompt the browser displays when asking the user for a user name and password.

User Names – Shows the users that are currently defined in this realm. Press Add to add a new user. Select a user name in the list and press Remove to remove that user.

Access Level – Sets the access level for the selected user.

> **None** – No access is allowed. The account is disabled.

> **Read Only** – Allowed to view data. No values can be changed.

> **Read/Write** – Allowed to view data, make changes to writeable values in a datalogger's Public or Status table or a virtual data source, and set a datalogger's clock.

> **All** – Allowed to view data, make changes to writeable values in a datalogger's Public or Status table or a virtual data source, set a datalogger's clock, use the API FileControl command, and publish websites.

Password – The password for the selected user.

After defining the desired user names and access levels, press OK to save the changes. (Note that the new .csipasswd file will not be sent until you press Publish Website.) You can also press Cancel to discard the changes. Press Read file to read a .csipasswd file into the **Website .csipasswd File Editor**. Press Save File to save the contents of the **Website .csipasswd File Editor** to a .csipasswd file.
